## FIELDS

---

Macroeconomics, monetary economics, household finance

## EDUCATION

---

**University of Notre Dame** – Notre Dame, IN

Ph.D. Economics

*Expected May 2026*

*Committee: Eric Sims, Jane Ryngaert, Christiane Baumeister*

**Indiana University** – Bloomington, IN

B.A. Economics & Philosophy

May 2017

Minor in English

## JOB MARKET PAPER

---

“Time to Shop Until Inflation Drops: The Effect of Inflation on Household Shopping Behavior”

*Abstract:* I study how households adapt their shopping behavior when inflation rises. Using transaction-level panel data from 2021–2023, I construct household-specific inflation exposure and estimate its causal effects on shopping intensity and bargain-hunting. Higher exposure leads to more trips, greater retailer diversification, and increased reliance on sales and coupons within trips. These adjustments entail real resource costs; using time-use data, I approximate the additional time households devote to price search and deal-finding. My findings suggest that households during the recent inflation episode absorbed part of the price shock by reallocating effort toward shopping.
